Validations.

- The user can't access the dashboard if he hasn't logged in or it doesn't exist in the database.
- All the forms to create/edit have validations.
- The model Movie has relation with the Platform and Category Model.

Database

- Run the migration first: **"php artisan migrate"**
- Run the Seeders: **"php artisan db:seed"**.
- **Schema**

Emails.

- Once the user registers, an email arrives to his mailbox (spam)
- The user will get an email if he creates a new movie.
- I'm including the .env file with an email account that I created for the assessment.
 - g33943871@gmail.com - Test\$Mail\$
